JOB TITLE	DATE ISSUED	REVISION
Process Engineer	10/31/22	A

OVERVIEW

GES Automation Technology is seeking a Process Engineer. This position is responsible for leading and participating in multi-disciplinary teams that design and execute process upgrade projects for GES clients, a majority of those in the food manufacturing segment. Work is focused within a three-hour radius of Harrisburg, PA, with limited travel.

RESPONSIBILITIES

- Design and support industrial process systems
- Provide project management services, including responsibility for cost, manpower, and schedule
- Develop project drawings and write specifications for equipment and contractor work
- Interface directly with the client throughout the project cycle, from initial development to implementation
- Manage a variety of outside contractors during project installation and startup
- Estimate project costs and pursue business development opportunities
- Source and procure equipment required for project design and execution

REQUIRED QUALIFICATIONS

- Candidates must possess a degree in process, chemical, manufacturing, or industrial engineering, or other related curriculum
- 3-5 years supporting work experience
- Strong computer skills in Microsoft Office applications
- Proficient in AutoCAD or similar CAD software
- Comfortable working in industrial manufacturing environments
- Strong project management skills

WE'RE HIRING!

- Effective communication skills for interacting with internal and external project team members
- Commitment to comply with company and client safety policies
- Ability to work independently

PREFERRED QUALIFICATIONS

- Familiarity with:
 - Food, beverage, and/or pharmaceutical process systems
 - P&ID (process and instrumentation diagram) drawings and electrical schematics
 - Sanitary process system design standards such as USDA, 3A, and EHEDG
 - Process instrumentation and componentry
 - PLC-based control system hardware and software
- Automation, validation, and good manufacturing practice experience in relevant industries
- Knowledge of industrial safety standards, regulations, and practices
- Experience with Autodesk Inventor or similar 3D CAD software
- Experience managing electrical and mechanical contractors
